Topics

Implementing FOCUS™

Learn how to adopt FOCUS™: the unifying format for cloud bills with native support from all four major cloud providers.

FinOps Beyond Public Cloud

Understand how to apply FinOps concepts and principles to SaaS, Licensing, Hybrid, and On-Premise technology spend to maximize predictability, allocation, and value.

Cloud Sustainability

See how FinOps and Sustainability teams partner to drive decision-making that evaluates both cost and carbon-related metrics.

FinOps for AI

Learn how to manage, forecast, allocate and optimize the costs of running AI in the Cloud.

FinOps Foundation

Session Types

Networking & Events

Connect with your peers and build your network with fellow practitioners. Share experiences and discover solutions to your FinOps challenges from real-world use cases.

Chalk Talks

Engage in collaborative Chalk Talk sessions, these group activities are centered around specific FinOps topics and help drive discussions into best practices

Breakout Session

Discover best practices and actionable insights from real-world practitioners, ask questions and understand specific topic use cases related to FinOps capabilities.

Keynotes

Listen to industry thought-leaders on how FinOps is evolving and the impact it is having on organizations across Europe and beyond.

Session 2 - Scaling FinOps at Mercedes-Benz

Need for Broader Impact and the Scalable FinOps Approach

- Traditional methods (training, policies) alone are insufficient.
- Target is to introduce FinOps Owner (multiplicator model) in each IT department / platform level.
- FinOps Owners act as ambassadors, promoting FinOps principles, monitoring budgets and optimizing cloud usage.

Where do we face the greatest difficulties in its implementation?

FinOps Foundation

Session 3 - Elasticity by Design (Coinbase)

Effective Savings Rate (ESR) is the best metric for understanding cost savings from optimizing rate.

$$\text{Effective Savings Rate (ESR)} = \left(\frac{\text{Cloud Savings Generated}}{\text{On-Demand Equivalent (ODE) Spend}} \right)$$

On-demand Equivalent (ODE) Spend

The amount your organization would have paid to the cloud provider if no discounts were applied. Think of this as the list price or on-demand rate for cloud services.

Definition and more info from FinOps Foundation

Cloud Savings Generated

The amount of dollars your organization saved on cloud costs. Cloud savings may be generated from rate, usage, or other cloud costs optimization strategies.
